

Student Right-to-Know

Graduation/Transfer-Out Rates

In accordance with the federal Student Right to Know Act of 1990, Eastern Wyoming College is reporting completion/graduation and transfer-out rates for full-time, first-time, degree or certificate seeking students who entered EWC for the first time in fall term 2003 and for full-time, first-time, degree or certificate seeking students receiving athletically-related student aid. The study identifies the percentages for those students who completed their programs of study or transferred to another institution within 150% of the length of their program of study (three years for a two year program).

While reviewing this information, please keep the following in mind . . .

- The study group (cohort) is defined by the federal government to include only students enrolled in credit classes full-time, entering college for the first time (no previous college experience anywhere), and seeking a degree or certificate.
- The study group does not include students who attended EWC part-time in Fall 2003 or who had attended college prior to Fall 2003. Also excluded are students who attended to upgrade job skills, gain new job skills, improve basic skills, maintain licensure, or for personal enrichment with no intent of earning a degree or certificate.
- These rates do not take into account students who started full-time but later enrolled part-time due to work or family commitments. Many community college students take more than three years to complete a program due to other demands on their time.
- These rates do not represent the success rates of the entire student population at Eastern Wyoming College, nor do they account for students who complete their degree/certificate or transferred to another college after the three-year tracking period.
- Athletic graduation and transfer-out rates include first-time, full-time degree/certificate-seeking students who received athletically-related student aid. Therefore, the athletic graduation and transfer-out rates may not represent the success rates of all athletes. The federal government requires that the athletic rates be reported by sport category: (1) basketball and (2) all other sports combined, which includes volleyball, golf and rodeo for EWC.
- The number of students included in the study is small; therefore, an insignificant change in the number of students completing their program of study or transferring to another institution may result in a significant change in the percentage rates.
