

Active and Collaborative Learning Bar Charts and Benchmark Item Composition - All Students

Description - Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.

| | Benchmark Scores | | |

| | | Number of Colleges | 7 | 525 |

Benchmark Score: Each benchmark score was computed by averaging the scores on survey items that comprise that benchmark. To compensate for disproportionately large numbers of full-time students in the sample, all means used in the creation of the benchmarks are weighted by full- and part-time status. Benchmark scores are standardized so that the weighted mean across all students is 50 and the standard deviation across all participating students is 25. Institutions' benchmark scores are computed by taking the weighted average of their students' standardized scores.

Score Difference: The result of subtracting the comparison group score (same size colleges or 2007 CCSSE Cohort) from your college's score on each benchmark.

Active and Collaborative Learning Bar Charts and Benchmark Item Composition - Part-Time Students

Description - Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.

| | | Score Difference | 1.6 | 5.8 |
| | | Number of Colleges | 7 | 525 |

Benchmark Score: Each benchmark score was computed by averaging the scores on survey items that comprise that benchmark. To compensate for disproportionately large numbers of full-time students in the sample, all means used in the creation of the benchmarks are weighted by full- and part-time status. Benchmark scores are standardized so that the weighted mean across all students is 50 and the standard deviation across all participating students is 25. Institutions' benchmark scores are computed by taking the weighted average of their students' standardized scores.

Score Difference: The result of subtracting the comparison group score (same size colleges or 2007 CCSSE Cohort) from your college's score on each benchmark.

Active and Collaborative Learning Bar Charts and Benchmark Item Composition - 0 to 29 Credits Students

Description - Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.
