Brush up your welding skills or learn a new trade!

WELD 0500

Intro Shielded Metal Arc Welding 1.0 Credit --- \$350.00

This is a 30 hour course using the shielded metal arc welding process. The course provides the training to weld light and medium thickness sheet and plate in all positions using E6010 and E7018 Electrodes.

WELD 0600

Flux Cored Arc Welding (Dual Shield) 1.0 Credit --- \$350.00

A 30 hour welding course using the flux cored arc welding process. The course provides the training to weld medium and thick (3/4") plate in all positions using .045" electrode wire.

WELD 0800

Maintenance Welding 1.0 Credit --- \$350.00

A 30 hour welding course using shielded metal arc welding (stick) and gas metal arc welding (wire) processes. The course provides the training to weld light and medium thickness sheet and plate in all positions.

Test Training:

For the experienced or professional welder!

Training is available for welders wishing to qualify under specific welding codes and specifications. This training consists of supervised practice and documentation of proper techniques, enabling the welders to overcome faulty habits. Practice specimens are made and tested, and the welders are guided toward correcting any welding faults they may have. At the end of the training week a decision can be made to test or not test with additional charges for the testing.

Workforce Training Grants Available!
