## Colleague ERP Environment Questionnaire

- d. How many processors are allocated to the server and what is there speed?  
**2 servers, speed – 2.67 GHz**
  - e. How much memory is currently allocated to the Colleague database listener?  
**16 GB**
  - f. Do you house any other databases on the Colleague Production database server and if so, what are they and what is there size?  
**No other databases are on the production server, just Colleague**
  - g. What is the size of your Colleague Production database?  
**85 GB**
  - h. Do you currently use a SAN for your Production Colleague system? If so, please provide the model and technical specifications of the SAN to include total and available disk space?  
**Yes, Model – EMC VNXe 3300, total disk size – 1.48 TB, disk space available – 800 GB**
  - i. Is this a virtual or physical server?  
**Virtual**
  - j. What is the current version of Java installed on the server?  
**Java 8.31**
8. Please provide the following current specifications for your Colleague production **application** server:
- a. What version of Windows Server are you currently using?  
**2008 R2 SP1**
  - b. How much total memory is allocated to the server?  
**8 GB**
  - c. How many processors are allocated to the server and what is there speed?  
**2 processors, speed – 2.67 GHz**
  - d. Do you have more than one application listener? If so, how many?  
**Yes, 3 application listeners**
  - e. How much memory is currently allocated to the Colleague application listener(s)?  
**8 GB**
  - f. Are any other applications other than Colleague and SQL hosted on the production application server? If so, what are they?  
**No**
  - g. Is this a virtual or physical server?  
**Virtual**
  - h. What is the current version of Java installed on the server?  
**Java 8.31**
