

# Eastern Wyoming College

## Clinical Observation Verification Form

The Eastern Wyoming College Veterinary Technology Program encourages students entering the program to explore their chosen career field. A minimum of one week (40 hours) or more of working or observing in some aspect of the animal industry is encouraged. Ideally this experience would be under the supervision of a certified veterinary technician.

Students that choose to take this recommendation will receive 25 points extra credit in Orientation for Veterinary Technicians (VTTK 1500), which is a required course for veterinary technicians and veterinary aides.

Please bring the completed form on the first day of class.
