

EWC SMART PLAN

PLANNER VIEW

Overview

The Planner View is identical for both students and academic advisors. This is the main view where you will individualize your plan. From here you can:

- View your academic history
- Add, remove, or change courses
- Adjust term target credit hours
- Add or remove entire terms

How To Use

Within the Planner View, you will notice a yellow shaded term on the left side of the screen. This indicates it is a registerable term. Depending on the time of year, more than one term may be "registerable".

A term is "registerable" once the schedule of classes is published. Once this happens, Smart Plan will compare the courses planned for that term against the schedule of classes. Smart Plan will adjust the plan as appropriate to ensure it is only planning courses that are being offered for the registerable term.

Within the registerable term(s), you will notice green text that says either "Available" or "Registered" in the block with each course. This indicates if the specific course is already officially registered for or if it is planned and available, but not yet registered for.

The screenshot displays the 'Planner View' interface. On the left, the 'Fall 2024' term is highlighted in yellow, indicating it is a registerable term. It shows a list of courses with their credit hours and status. A grey arrow points to the 'COM 20400 - Lecture' course, which is marked as 'Registered'. To the right, the 'Spring 2025' and 'Fall 2025' terms are also visible, each with a list of courses and their credit hours. The 'Fall 2025' term includes an 'ELECTIVES' section with a note to choose course(s) to satisfy the minimum 120 credits required for graduation.
